This "no downtime" lunchtime procedure exfoliates your skin exposing a fresh clear complexion. Helpful for acne, congested, dry, and ageing skin.

Customised Dermal Peels

These medium depth peels are known for their excellent results and safety profile. Every peel you receive will be different from the last, we can customize them to target deeper pigment, acne scarring, photo damage, acne, reduce pore size and pre mature aging. Chemical peels can thicken the epidermis and increase dermal volume as well as stimulate collagen.

We believe in repeated treatments for progressive and gradual results, and to avoid the side effects and downtime associated with deeper peels. Treatments can be performed on the face, neck, décolleté and hands. For glowing, younger looking, rejuvenated skin, dermal peels are the answer.
