MEDIOSTAR NEXT

High Speed Hair Removal

Safely treat light & dark skin types

- + FAST, SAFE AND EFFECTIVE
- + PAIN-FREE
- + NO DOWNTIME
- + PERMANENT RESULTS

THE ADVANTAGE

As a leader in innovation, the MeDioStar provides the most advanced hair removal solution available. By combining two laser wavelengths, patients of all skin types are now able to enjoy the benefits of laser hair removal with zero pain and minimal risk of side effects.

FAQ's

Is the treatment painful?

No. MeDioStar's unique 'SmoothPulse Mode', combined with built-in skin cooling provides maximum comfort and a pain-free experience. Topical anaesthetic is not required.

How long is a treatment?

Treatment times vary depending on the size of area. On average, a treatment will take between 2-15 minutes to complete.

How many treatments are required?

Significant results can be seen after just 1 treatment. Typically, 4-6 treatments are required for permanent hair removal. Note: Red, grey & white hairs cannot be effectively treated with any laser.

When will I see results?

Results are commonly seen at the completion of each treatment cycle, with less hair growing back after each successive treatment.
